Claims – Objections

Claims 6-8 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 6-8 have not been further treated on the merits.

Drawings – Objections

Figures 13-A, 13-B and 14 should be designated by a legend such as --**Prior Art**-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

Claims 1-5 and 9-11 are allowable. The following is a statement of reasons for the indication of allowable subject matter: the prior art taken either singly or in combination fails to anticipate or fairly suggest the features/limitations of applicant's independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. Specifically, with respect to applicant's sole independent claim, the prior art taken either singly or in combination fails to anticipate or fairly suggest an electrooptical optical path switching device comprising, *inter alia*, a light transmitting portion where a plurality of refractive regions are formed so that the refractive index of light therein can be controlled using an electro-optical effect, the thickness of the light transmitting portion varying along the direction in which light propagates (Claim 1, Lines 5-6), having a first electrode layer and a second electrode layer formed so as to sandwich the light transmitting portion and cover at least the portions of the refractive regions (Claim 1, Lines 6-9), taken together in combination with the totality of particular features/limitations recited therein. Each of the objected-to claims 6-8 would be allowable if the improper multiple dependencies therein were appropriately removed.
